

## **ACTi and Milestone help Puopolo Smallgoods to successfully convert an existing analogue surveillance system to an IP video surveillance solution.**

ACTi's SED-2100R video server and Milestone Systems' XProtect software successfully have helped Puopolo Smallgoods, an Australian meat processing factory, to convert their surveillance system from analogue to an IP network approach.

Puopolo Smallgoods is a meat processing factory in Victoria, Australia. The main purposes for Puopolo Smallgoods to initially setup the analogue surveillance system were to record the production process, prevent accidents, and to strengthen security.

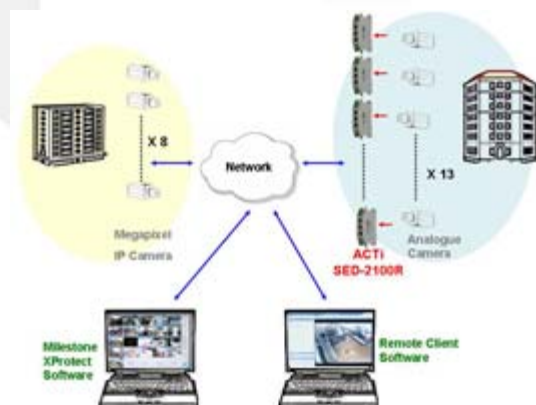

However, as time goes by, Puopolo Smallgoods has now expanded with the addition of a new building. Alloys International and Unity Computers assisted Puopolo Smallgoods to add more Megapixel IP Cameras in their new building. In addition, through the installation of the ACTi SED-2100R, Puopolo Smallgoods can mix the existing 13 analogue cameras with 8 new IP Cameras in the new building via 1GB Cat6 link. The existing analogue system can also be easily integrated into the complete IP surveillance solution.

In terms of management, which is the significant improvement with an IP surveillance solution, Milestone's XProtect software plays an important role in this project. Due to Milestone's scalability and impressive performance, the customer now has full access to cameras in the old

manufacturing building and the new manufacturing building from any PC on the network; employees can have different levels of access through the entire complex via their PC's.

Implementing IP surveillance solution gives the customer the ability to add more IP cameras throughout the complex as required in future.

“ACTi’s MPEG4 Video Server full D1 at 25 FPS with lower bandwidth helped us to convert our analogue surveillance system to an IP surveillance system. Most

importantly, ACTi products’ decent frame rate and video quality are very impressive,” said Michael Capuano, Business Development Manager at Unity Computers.

### About ACTi

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance products and solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP-based surveillance product line and provides one-stop-shopping convenience for IP surveillance solutions including MPEG-4 IP cameras, video servers, transcoders, and NVRs. ACTi also offers management application software and SDKs for integrated solutions. ACTi is the best choice and most reliable partner in the IP surveillance market. For more information, please go to [www.acti.com](http://www.acti.com)

### About Alloys Network Video Products Division

Alloys Network Video Products Division (AlloysNVP) is able to design a range of industry leading solutions including single to multi-site surveillance, anti-terrorism protection, and access control with ACTi and Milestone products. Please contact AlloysNVP at [www.alloysnvp.com.au](http://www.alloysnvp.com.au) for more technical advice and product demonstrations.

### About Unity Computers

Unity Computing Services specialise in IP security from the design stage to onsite implementation, with a focus on manufacturing warehousing and retail (medium to large scale) security requirements.
