

Pro Series Network Camera

MPEG4, CCD, Low Light, NTSC

This full-featured, high-quality network camera covers security surveillance and video conferencing needs.

Model
503181

The INTELLINET NETWORK SOLUTIONS™ Pro Series Network Camera is designed for security surveillance applications and comes fully equipped with state-of-the-art features, setting it apart from other network cameras on the market today.

Superior Video Quality

Because the Pro Series Network Camera uses a CCD sensor, it provides sharp video images with dramatic lifelike color representation.

View Images in the Dark

With low light sensitivity, the Pro Series Network Camera can be used to monitor and record video in rooms with minimal lighting, making it ideal to use at night.

Flexible Video Formats

The Pro Series Network Camera supports MPEG4 as well as JPEG video formats, providing superior quality and at the same time continuing to support existing applications (the law in most countries only accepts JPEG video format as evidence in court). MPEG4, on the other hand, allows you to transmit a larger amount of data over the same amount of bandwidth, while providing smooth and seamless viewing.

Bi-directional Audio Support

Attaching a microphone and loudspeakers to the Pro Series Network Camera allows you to listen and talk using the 2-way audio support. This is ideal for most security and surveillance applications, but can be applied to provide cost effective video conferencing, as well.

Power over Ethernet

The Pro Series Network Camera supports the 802.3af standard, allowing it to be installed in locations where an AC power source is not readily available. Simply plug the camera into a PoE-compliant switch, and begin transmitting power as well as data over the Cat5e or Cat6 network cabling.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all INTELLINET NETWORK SOLUTIONS products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
