Notes:

OK Delete Cancel

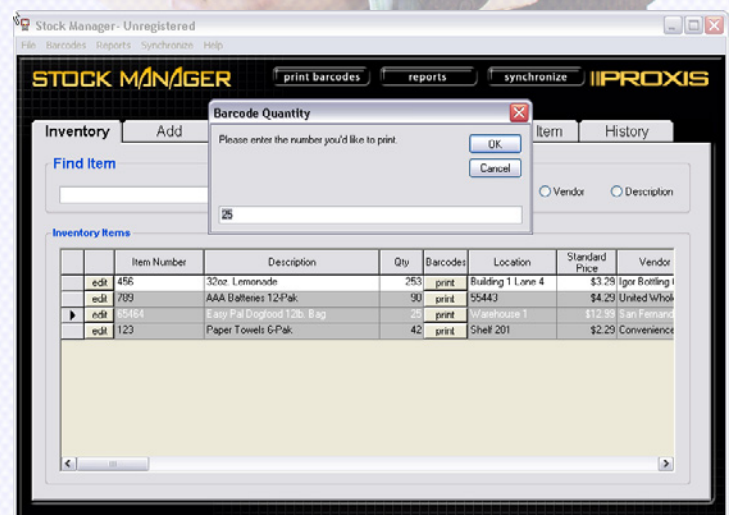

- Print barcode labels on demand for any item
- Manage stock from mobile devices
- Synchronize multiple mobile devices
- Automate physical counts
- Run comparison reports
- Export data in CSV format for integration with other applications
- Perform data backups

Maintain Control & Improve Profits!

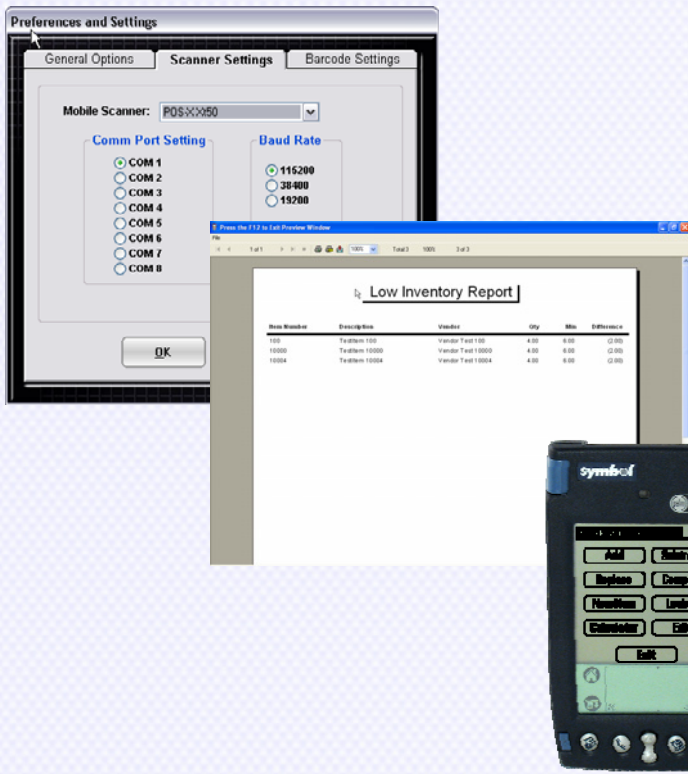

Powerful, yet simple functionality and built-in reports help improve inventory turns, provide accurate stock valuations, and control shrinkage.

- Scan to receive items into inventory
- Automatically print barcode labels when receiving items
- Scan to add, subtract, move, or replace items
- Lookup by item cost, price, list price, vendor or location

Designed for Compatibility & Easy Set Up!

Stock Manager's compatibility with a wide variety of traditional barcode scanners, mobile scanning and PDA devices, barcode labels and thermal printers ensures the mobility and flexibility businesses demand for today's inventory operations.

Flexible Data Entry for the Way You Work!

- Scan item barcodes with any corded scanner connected to the PC.
- Enter inventory items manually via keyboard data entry.
- Simple to install and configure, Stock Manager automates inventory processes quickly to maximize return on investment.
- Choose a mobile handheld barcode scanner to process inventory transactions from anywhere in the warehouse.

SYSTEM REQUIREMENTS

- Any Pentium Class or better computer
- 64MB RAM or better
- 50 + MB of available hard-disk space
